

## Extend Your Analyzer Warranty

- Stay up to date with the latest battery diagnostics software available
- Save on the cost of component replacements

## Establish a Preventive Maintenance Program

- Protect and extend the life of your investment
- Replace wear items before they fail
- Improve efficiency and minimize unplanned delays and expenses

## Annual Certification & Calibration Program

Does your internal quality or management program require regular certification or calibration of test equipment? Midtronics will support you with scheduled routine analyzer calibration against NIST traceable standards. A Certificate of Calibration and Conformance documenting the following variables is also available:

- Analyzer ID numbers and customer purchase order reference information
- Before and After test data
- Software and parts used if necessary
- List of ANSI traceable test equipment used during the calibration process
- Critical environmental variables
- Approval documentation

## Extended Warranty & Preventive Maintenance

**CELLTRON**  
Portable Battery Analyzers

Battery maintenance and inspection activities around the world depend heavily on Midtronics test equipment to determine the state of health of each battery and battery string. Maintaining the analyzer is critical for reliable performance. Inadequate maintenance can lead to excess analyzer wear and failures that can create unplanned delays and expenses in your testing schedule.

Midtronics offers extended preventive maintenance and warranty service plans to ensure your analyzer is properly maintained and has the latest software and test algorithm updates. Midtronics will support you by scheduling routine analyzer certification and calibration to satisfy your internal quality or management system requirements.

**CELLTRON**  
Portable Battery Analyzers

**MIDTRONICS**

Advancing Battery  
Management

## Simplified Battery Analyzer Maintenance

Power reliability becomes more critical each day in telecommunications, data centers and other industries. The analyzer technology available for inspecting the batteries that provide this reliability has grown in complexity and importance. As a result, proper analyzer maintenance is needed for operating an effective battery management program.

## Preventive Maintenance Programs

Preventive Maintenance Programs are offered on all new and select used Midtronics **CELLTRON** Essential, Advanced, Ultra and Max analyzer platforms.

### Preventive Maintenance Programs:

- 1 year – includes 72 hour turnaround service
- 2 years (annual) – includes 48 hour turnaround service
- 5 years (annual) – includes 24 hour turnaround service

### All Preventive Maintenance Programs include:

- Full analyzer cleaning and inspection including replacement of keypad and overlay
- Update software and test algorithms to provide the most current battery diagnostics available
- Integrity verification of all critical internal and external connections
- Cable replacement options
- Replacement of internal battery if remaining capacity is below specifications
- Verification of critical PCB component integrity
- Certification and calibration against NIST traceable standards with a Certificate of Calibration and Conformance containing:
  - Analyzer ID numbers and customer purchase order reference information
  - Before and after test data
  - Software and parts used if necessary
  - List of ANSI traceable test equipment used during the calibration process
  - Critical environmental variables
  - Approval documentation

## Extended Product Warranties

Extended Product Warranties are offered on all new Midtronics **CELLTRON** Essential, Advanced, Ultra and Max analyzer platforms. In addition, analyzers in service may be eligible for an extended warranty upon review by Midtronics certified service technicians.

### Available Extended Warranties:

- 1 year extended (2 year total product warranty)
- 2 years extended (3 year total product warranty)
- 3 years extended (4 year total product warranty)

### Extended Warranties include:

- Repair or replacement of all hardware and components, excluding cable sets, clamps and probes
- Update software and test algorithms to provide the most up to date battery diagnostics available
- Does not cover component breakage caused by misuse or improper installation

### 2 year package also includes:

- 48 hour turnaround guaranteed after receipt

### 3 year package also includes:

- 24 hour turnaround guaranteed after receipt
