

Midtronics Launches A New Era In Battery Monitoring

For Immediate Release

MARCO ISLAND, FL AND WILLOWBROOK, IL, USA, May 5, 2008 – Building on the largest intellectual battery analysis property portfolio in the industry, Midtronics announced the release of the **CELLGUARD Battery Monitoring System** at the 2008 Battcon Conference. Utilizing an advanced wireless intra-system communications architecture for ease of installation, the CELLGUARD battery testing line extends Midtronics industry-leading battery testing line into monitoring applications.

“CELLGUARD represents Midtronics commitment to constant innovation in the area of stationary battery management,” said Todd Stukenberg, Executive Director of Marketing for Midtronics.

“The system features the latest in wireless communications technology, web and server-based data management, all wrapped around Midtronics leading research and development in battery analysis and diagnostics.”

Crafted for most stationary power applications, the wireless architecture is designed for more cost-effective and precise installation, particularly in the UPS environment. More information on the CELLGUARD Battery Monitoring System is available at www.midtronics.com.

Editor's Note:

Midtronics is focused on the development and marketing of innovative technologies for battery management. With a history of advanced battery-related research, Midtronics' patented technologies have been tailored for a variety of applications, including transportation (automotive, heavy-duty trucking, off-road), stationary and motive power, and military use. The development of progressive products has positioned the company as a leader in the industries it serves. Headquartered in Willowbrook, Illinois, USA, Midtronics has offices in IJsselstein, The Netherlands, and Shenzhen, China and a global network of distributors.
