Battery Management Innovation

## MCR-500XL Kit

### Jump Start your Battery Sales with the Midtronics MCR-500XL Tester

Using the MCR-500XL can save you money and help you sell batteries. The key to selling more batteries is to use the MCR-500XL to test every battery that comes into the shop. Testing every battery that comes into your shop ensures that you can identify battery and electrical system sales opportunities BEFORE the customer leaves. Turn every customer contact into an opportunity to increase customer satisfaction by using the MCR-500XL tester.

#### Advantages:

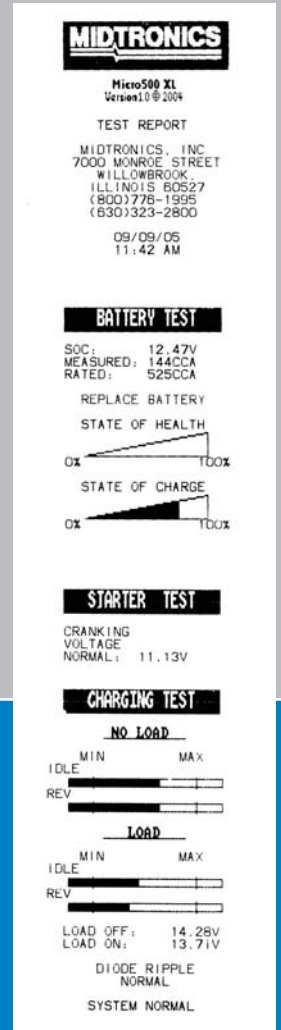

- Performs fast and simple proactive battery test to increase sales opportunities
- Back-lit graphical display keeps operation simple
- QC memory holds up to 100 QC tests
- Time-to-charge calculator tells you exactly how long to charge a discharged battery
- Date and time of test appears on the printout for accurate record keeping
- High-speed IR printing—show the results with advanced graphical printout
- Field programmable for future test feature upgrades
- Removable cable set
- Tests discharged batteries down to 1 volt

#### Advanced Battery Testing:

- Proven conductance technology and test algorithms—Midtronics analyzers are required for warranty testing at automotive dealers around the world
- AGM test algorithm for testing the next generation battery (including spiral batteries)

#### Advanced Starter/Alternator Testing:

- Quick starter analysis without disabling the ignition
- Advanced menu-driven interface for a complete system analysis in seconds
- Graphical printout of charging system measurements provides an accurate analysis that the customer can easily understand

MCR-500XL Kit  
• Includes high speed IR printer
